

Art.-No.: 6.8820.0250

8820

8820 C-GLAZE

Characteristics

C-Glaze 8820 is a sealant for paint surfaces as well as most plastic parts installed on the vehicle.

Fast and easy to use, lasting protection for up to 6 weeks. Thanks to the lotus effect, the treated surfaces stay longer clean and easier to clean.

Raindrops and soiling simply bead off and C-Glaze also gives a deep shine and a velvety smooth surface.

8820 C-GLAZE was developed, tested and produced in Germany.

Contains Silicone but it's Bodyshop friendly.

V.O.C. Value

0 gr / Liter

Tech Tip

Polish the desired area and clean thoroughly with C-Clean 8810.

C-Glaze 8820 can be applied to existing 8830 C-Protect Nano coatings.

Due to the specially coordinated composition, the two coatings combine with each other and extend the service life significantly.

After treatment with 8820 C-Glaze, the surfaces are in a condition just as recently coated.

Application

First Clean surface with C-Clean 8810. Apply 2-3 sprays onto a cloth (4CR 6160 Degreasing cloth Santara), then buff up with a clean microfiber cloth until the surface is streak-free and high-gloss.

Apply the 8820 C-Glaze with a few sprays onto a microcloth (microfiber cloth 6255) and spread over the surface, panel wise, then directly buff up with a clean microfiber cloth.

Allow to dry for 2 hours in a dry and clean environment such as garage or carport.

Do not apply on fresh painted surfaces !.
